This is the current list of general education courses to be found in the AAS/AAA degrees. Due to limited resources, not all colleges will offer all courses, but it is expected that a college will accept for transfer any system-wide general education course a student may have successfully completed at another college.

Not all these courses transfer equally to the UW System. Courses that are listed in bold type are part of the current Universal Transfer Agreement with the UW System which, according to the agreement, will satisfy a general education or general degree requirement at the receiving UW or WTCS institution and may include elective credit. In addition, these courses may satisfy degree requirements differently depending on the course requirements related to the major that the student declares.

Before registering, students should talk to the advisor and consider their academic goals and intended major.

If transferability is a student’s major goal, then verification of the transfer equivalency of each course prior to enrolling in the course would be very important. For up-to-date information on the transferability of a particular course to a UW System institution, please refer to the UW System’s Transfer Information System website which is found at www.uwsa.edu/tis/. In addition, these courses may be reviewed in the future for their continued inclusion on a list of system-wide courses appropriately rigorous for post-secondary coursework.

Students at the Liberal Arts Colleges (MATC-Madison, MATC-Milwaukee, Nicolet Area Technical College, Chippewa Valley Technical College and Western Technical College) also have the option of selecting comparable courses at aid code 20 (the 200 level courses) in lieu of these aid code 10 system courses.

WIDS course outcome summaries are available on the MyWTCS website: <http://mywtcs.wtcsystem.edu/>.
