

# Faculty Quality Assurance System

## College Course Offerings

The Wisconsin Technical College System (WTCS) and 16 technical colleges, offer a variety of methods by which faculty can complete professional development associated with the foundational FQAS Competencies. WTCS has grouped these competencies into four course groupings: Assessment & Curriculum, Diversity, Equity & Inclusion, Student Success, and Teaching Methods.

Each college manages their own course schedule, times, methods in which the courses are offered (online, face-to-face, hybrid, independent study), cost (if any), and availability to faculty in-district, out-of-district, or both. If you are interested in taking a course, please contact the college representative listed below.

|                               |                    |  |
