Online courses available through the statewide collaborative project

Thank you for your interest in the Statewide Online Collaborative Competency courses offered through the WTCS Office! The primary goal of the courses is to provide competency-based FQAS professional development courses to faculty throughout the districts. The courses are taught entirely online and provide structured, weekly activities and assessments to guide faculty through the competencies of FQAS. Faculty that have participated in the past have been very pleased with not only the information, diverse perspectives, and training gained from the courses, but also the flexibility of the online environment. Please review the document for further information on the WTCS Statewide Online Collaborative Competency courses.

**Registration:** Registration is open to all faculty employed through the Wisconsin Technical College System or Department of Corrections (DOC).
